

247 Honors Project

You are to read one of the following books:

1. BLIND WATCHERS OF THE SKY, by Rocky Kolb
2. GENERAL RELATIVITY FROM A TO B, by Robert Geroch
3. RELATIVITY VISUALIZED, by Lewis Epstein

The first book is a historical account of cosmology which relates to mechanics and relativity. The latter two books are about relativity. You are to write a 3+ page book report in the style of New York Times book review. It will therefore need a catchy intro, followed by a critique of the book, including its strengths and weaknesses.

This report is due on the last day of class.
