

A Spin through Physics with

Willy

Jim Sowinski

PSV – My first project in grad school

When our Willy
Met a filly
All that mattered
Was she flattered?

Actually a good source for LN dewers

PSV

To do frontier physics you must develop new instruments. Get your hands dirty!

30 tons of fun!

It is polarized;-)

Spin the bottle

One of my first publications
Used with pol. ^3He and d in
IUCF Cooler (while Willy
was busy on the other side
of the ring).

Only time since grad school
I collaborated with Willy

Thanks again Erhard

Bad

Good

Too much gray

While the cats are away the mice will play.

A dangerous mix: beer and brushes.

All work must be documented in the log book.

And accomplishments celebrated.

Other transitions between red and gray

It's always been Willy!
