"HDATLTW", is an entertaining, interactive physics demonstration lecture consisting of the more visual and dramatic demonstrations from an introductory physics course. The show usually lasts close to microcentury and about 25 demonstrations are performed. It is fast paced and is meant to promote interest in science and further discussion."

David is the Mad Scientist from the Tonight Show with Jay Leno. He received the 'Teacher of the Year' award for Natural Science in 1990. In addition to teaching, he has also developed Physics apparatus, written computer software, contributed to several Physics texts and co-produced a video on the Physics of Firewalking. David participated in the World's Hottest Firewalk in 1997, and the World Record Longest Firewalk, held in 1998.
